The Active, Beautiful, Clean (ABC) Waters Programme is a long-term initiative by Public Utilities Board (PUB) and the Sungei Tampines and Sungei Api Api projects are taken up to provide “active, beautiful and clean” waterways.

The Active, Beautiful, Clean (ABC) Waters Programme is a long-term initiative by Public Utilities Board to transform utilitarian canals, drains and reservoirs in Singapore into beautiful, vibrant and clean flowing rivers, lakes and streams that blend naturally with the urban environment. As part of the ABC Waters Program, the Sungei Tampines and Sungei Api Api projects are taken up to provide “active, beautiful and clean” waterways.

A collaborative effort between water and urban development, planning, design + development and environment business lines, AECOM was appointed to Sungei Api Api and Sungei Tampines provide consultancy services and design appropriate water sensitive urban design elements and at the same time provide landscape architecture for the S\$7 million

project.

Nearly one kilometer of the town’s two waterways will be spruced up by 2015. Current mangroves will be preserved, with more greenery planted along the canal walls. Gardens which filter rainwater through soil and plants will also be installed.
